Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Electi n/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19 and 20-31, drawn to an apparatus for coating a substrate and an apparatus for metallizing a substrate/creating an EMI shield, classified in class 118.
 - II. Claims 32-37, drawn to a method for manufacturing an EMI shield, classified in class 427.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case with respect to the apparatus of claims 1-19, the apparatus as claimed can be used to practice another and materially different process. For instance, the apparatus can be used for etching. In this case, with respect to the apparatus of claims 20-31, the apparatus as claimed can be used to practice another and materially different process, such as etching. Additionally, with respect to the apparatus of claims 20-31, the process as claimed can practiced by another materially different apparatus, such as an apparatus that rotates the processing apparatus to adjacent substrates in a circular configuration, rather than moving in-line and/or vertically like the claimed apparatus.
3. Because these are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction of Groups I and II for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Craig Wong on March 19, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karla Moore whose telephone number is 703.305.3142. The examiner can normally be reached on Monday-Friday, 8:30am-5:30pm.
